

INTRODUCING a simple

Quality water systems are designed to deliver better-tasting, purer drinking water while protecting your family from the various undesirable elements which can be found in hard water, including iron, lead, dirt and rust. But a quality water system featuring Osmonics components offers more than just cleaner drinking water - it also improves your way of life.

How an Osmonics Quality Water System Will Benefit Your Family:

In the kitchen

- Healthier, better-tasting drinking water
- Improves the taste of juice, coffee, soup and ice
- Eliminates need for expensive bottled water
- Fresher flavors when boiling and steaming
- Cleaner dishes and china

In the bathroom

- Leaves skin feeling smoother after showering, shaving and washing
- Makes hair softer and more manageable
- Reduces soap scum and residue on showers, tubs and sinks

Plumbing and Appliances

- Increases water heater efficiency by almost 30%
- Improves water flow and pressure by eliminating build-up in pipes
- Clothes and linens are cleaner, softer and last longer
- Adds life to dishwashers and washing machines
- Requires less laundry detergent, saving you money

treatment *for Better Water*

Quality water systems feature a two-stage conditioning and filtration process. The conditioning appliance provides your home with an uninterrupted, low-cost supply of treated water. Meanwhile, the filtration unit is hidden under the kitchen sink and works in conjunction with the conditioning component to deliver cleaner, better tasting drinking water.

The Autotrol® Brand Valve

The Autotrol control valve from Osmonics conditions water effectively and economically. Its many features include:

- Exceptional efficiencies that save water and regenerant
- An outstanding control valve limited warranty
- Durable, corrosion-resistant Noryl® plastic construction ensuring longer life
- Duraflow™ valve disc technology that provides a frictionless seal for long service life

The 460i Timer Control

The Autotrol 460i is an intelligent and extremely economical demand-based control that provides sophisticated performance without the high cost.

- Uses less than \$2 of electricity per year
- Control meter measures actual water usage for automatic regeneration only when needed
- Power options for easy installation and safe 12-volt operation
- Retains memory setting after power failures
- Saves up to 50% on water and regenerant

Osmonics also offers the simple 440i timer control, which has delivered reliable performance and outstanding value to millions of homeowners throughout the world.
