Customer reviews

★★★★★ Walking:

I use it to travel from home to my company during winter and it keeps me warm throughout the journey.

★★★★★ Motorcycling:

I use it when traveling around. It is very warm and comfortable. I use it even when I am in the comfort of my own home as it is very soothing.

Warm up the pressure point "Daitui"

so Warm!

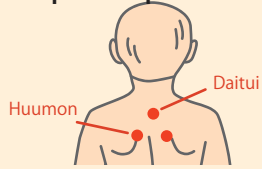

The "Kairo" put in the pocket.

When you heat the pressure points on your back, the whole upper body becomes warm.

Is it true?

The pressure points

It is said that a good practice is to warm up the pressure points "Daitui" and "Huumon" on the back when one starts feeling cold. When you heat up these points, warmth is transmitted evenly and widely to the body.

SO WARM!

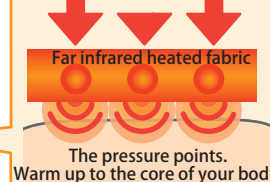

The pocket lining is made of far infrared heated fabric.

(Behind the pocket)

It warms more pleasantly and effectively.

The heat source of the hand warmer

The pressure points. Warm up to the core of your body.

Countermeasure against cold winter

Warmth lasts for 6 hours.

Measured with Thermo Viewer.
