Flap cannot be removed.

How to use coolbit®

Point to cool coolbit® patch

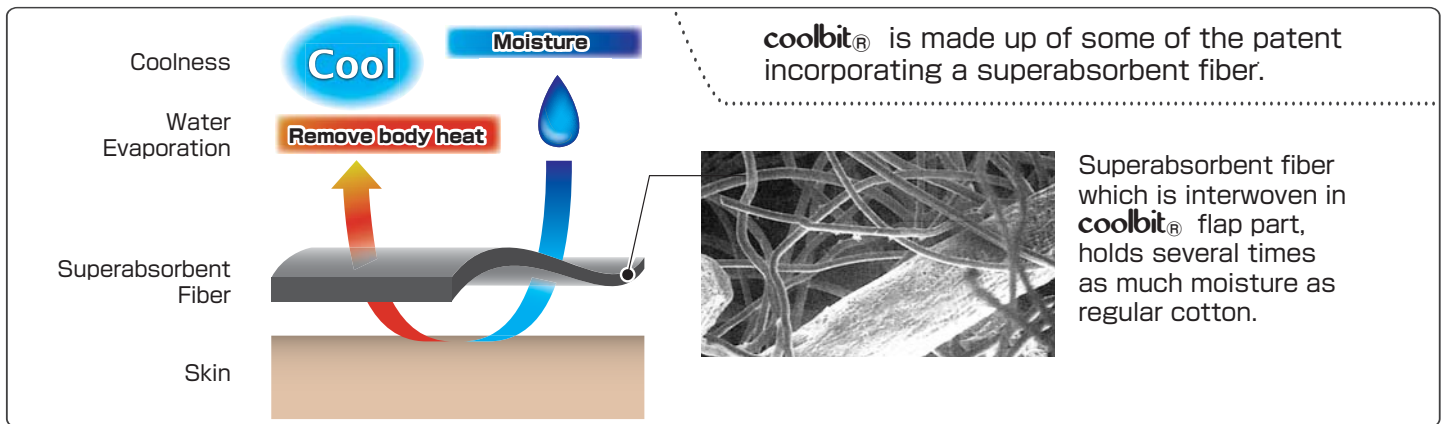

soft brim

Built-in high water absorption fiber. Cool in the heat vaporization of water.

Comfortable and easy to wash!

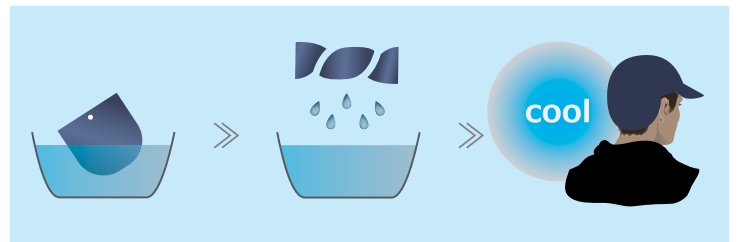

About coolbit

coolbit® has superabsorbent fiber embedded by patented process and corresponds with various anti-heat exhaustion products.

How to use coolbit®

- 1 Soak the flap in water for about 1 minute. Cold water will give you better effect.
- 2 Take the flap out of water and squeeze it lightly. Then attach it to the cap.
- 3 When the flap is exposed to the sun, it becomes very cool. After the coolness is reduced, soak the flap in water again.

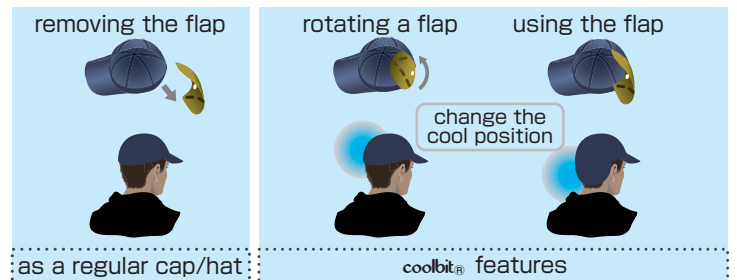

Major characteristics of coolbit®

Simple remove the flap from coolbit® cap and soak it in water, squeeze it, and you will get UV protection as well as cooling effect.

- 1 The back of your neck is protected against direct sunlight and harmful UV rays.
- 2 Directly cool off the back of your head and neck where motor nerves are localized.
- 3 A removable flap allows you to get the cooling effect easily. You don't have to soak the whole cap.
- 4 Rotating flap can be folded up inside the cap. The flap lets you cool off any part of your head you want.
- 5 Can be used as regular cap by removing the flap.
