

Energy Plus is looking to grow and add valuable members to our team! We are seeking to expand our Sales Team and Installation Crew with individuals that enjoy learning and working with clients. Energy Plus is also looking for a dependable person to add to our Service Department.

Looking to work in a low stress, team environment? Locally owned and invested in the community since 1978, Energy Plus's mission is to provide efficient products that provide warmth, security and joy to your family and ours. We also take pride in sharing our extensive knowledge of the products we sell with employees and clients alike.

We are not a high-pressure sales environment; our Sales Team's main directive is to find the product that best fits our customers' needs. Joining our Sales Team is a great way to learn invaluable information regarding home heating systems, home spas and heritage grade patio furniture.

While installing gas and wood fireplaces may be the most challenging part, it can also be incredibly rewarding. We install the heart of the home. It is where the family gathers, keeps the house from freezing, and nothing can be more important than making sure this is done correctly. Joining our Installation Crew is an excellent way to add new skills to your tool bag.

With over 40 years of the best products being sold and installed correctly, we have a rather big family to take care of. Service keeps this relationship strong. Coming aboard as a Service Tech will broaden your knowledge of gas and wood appliances by troubleshooting issues our clients may encounter throughout the lifetime of these products.

If you would like to start your workday sipping coffee by a wood stove commiserating with coworkers that care, apply in store!
